Joshua Thornton
Vice President
Baldwin County Economic Development Alliance
Robertsdale, AL 36567

Mr. Thornton:

We have done an initial review of the conceptual designs showing rail access to the Baldwin County Megasite. Based on a wye configuration off the CSX mainline, CSX Transportation (CSXT) is willing to review and work with the property owners and/or customers to develop a final design to serve potential customers wanting rail access to this site. We would work to meet the customer's rail needs in conjunction with meeting CSXT's operating requirements while attempting to minimize the impact of rail construction on any potential wetland areas.

CSXT is excited about working with the Baldwin County Economic Development Alliance in the development of the Baldwin County Megasite.

If we can be of additional help in anyway, please don't hesitate to contact us at any time.

Sincerely,

John C. Sanford
